CONTENTS

No. 1 JULY, 1927

ALDEN B. DAWSON. Modified lymph nodes from dogs with a known history of irradiation, including a note on 'globule' leucocyte formation. Five plates (thirteen figures) 1

H. A. HARRIS, S. H. GRAY, AND CAROLINE WHITNEY. The heart of a child aged twenty-two months presenting an anomalous vein from the pulmonary auricle to the right internal jugular vein, transposition of the great vessels and left superior vena cava. Five figures 31

EBEN J. CAREY AND WALTER ZEIT. The early postnatal development of the patella of the dog (Canis familiaris). Eleven figures 51

EARL F. HENDERSON. The longitudinal smooth muscle of the central vein of the suprarenal gland. Six figures 69

NATHAN CHANDLER FOOT. The reticulum of the human spleen. Two plates (four figures) 79

NATHAN CHANDLER FOOT. On the endothelium of the venous sinuses of the human spleen. Twelve figures 91

E. HORNE CRAIGIE. Notes on the blood vessels of the brain in a holocephalian—Hydrolagus (Chimaera) colliei. Two figures 103

P. ARTHUR DELANEY. Reliable methods for the fixation and staining of Nissl substance. 111

P. ARTHUR DELANEY. Peculiarly arranged connective tissues ending in epidermis. Two figures 121

No. 2 AUGUST, 1927

GEORGE M. HIGGINS. The extrahepatic biliary tract in the guinea-pig. Thirteen figures. 129

MALCOLM BROOKFIELD GILMAN. A note on a rare congenital pelvic kidney. Two figures. 149

R. J. BEAN AND N. B. DREYER. Duplication of pancreatic bladder and accessory pancreas in the cat. One text figure and four plates 155

MARIE DEES-MATTINGLY. On the nature of the capsule and framework of the fat-corpuscle. Six figures 175

ALBERTA DOYLE INNES. A description of a simple laboratory apparatus for obtaining accurate tracings of objects. One figure 195

No. 3 SEPTEMBER, 1927

J. S. Nicholas. Neuro-anatomical preparations. Four figures 199

Henry L. Jaffe and George N. Papanicolaou. A case of hermaphroditismus verus lateralis in a guinea-pig. Fourteen figures 205

C. M. Jackson and Margaret Shiels. Compensatory hypertrophy of the kidney during various periods after unilateral nephrectomy in very young albino rats. Three figures 221

Samuel Wood Chase. The enamel prisms and the interprismatic substance. Ten figures. 239

Sloan G. Stewart. The morphology of the frog's kidney. Six figures 259

Francis James Warner. Vestigial and provisional uriniferous tubules absent in the metanephros of birds. Two figures 271

No. 4 OCTOBER, 1927

R. J. Terry and George A. Seib. On the specific gravity of the blood. Experimental evidence of difference in weight of the blood of the right and left ventricles of the heart 279

Ernst de Vries. Description of a young human anencephalic and amyelic embryo. Seven figures 293

Benjamin Esterman and Abraham J. Gitlitz. Notes on the Golgi apparatus in spinal-ganglion cells of the cat. Three figures 319

Harold D. Caylor, Carl F. Schlotthauer, and John de J. Pemberton. Observations on the lymphatic connections of the thyroid gland. Four figures 325

R. Russell Best and P. M. Bancroft. Rotating functions of the iliacus and psoas major muscles. Four figures 335

Howard R. Mahorner, Harold D. Caylor, Carl F. Schlotthauer, and John de J. Pemberton. Observations on the lymphatic connections of the thyroid gland in man. Five figures 341

E. V. Cowdry and W. P. Covell. Quantitative cytological studies on the renal tubules. II. Mitochondria-cytoplasmic ratio. One figure 349

Eliot R. Clark and Eleanor Linton Clark. On the failure of endothelial cells, even after desquamation, to be transformed into wandering cells, with observations on the nature of endothelium. Six figures 357

Earl T. Engle and John Rosasco. The age of the albino mouse at normal sexual maturity. One figure 383

K. S. Chouke. Some interesting anomalies of the human body. Three figures 389
